

FALL VEGETABLE GARDENING

The summer is coming to an end, but that does not mean you have to stop gardening. Fall is a great time for edible gardening. In fact, flavors of vegetables maturing in the cool, crisp days of autumn are often sweeter and milder than those grown during hot summer weather.

SUPPLIES

- Garden Gloves
- Vegetable Seeds
- Miracle-Gro® LikaFeed® Tomato, Fruits & Vegetables.
- Miracle-Gro® Soil
 - Use combination of Potting Mix and Garden Soil for raised beds
 - Use Garden Soil for in-ground vegetables
- Watering Can
- Frost Protection Fabric

STEPS

STEP 1

Select appropriate vegetables for fall season.

STEP 5

Feed germinated seeds every 7-14 days with Miracle-Gro® LikaFeed® Tomato, Fruits & Vegetables.

STEP 2

Prepare soil:

- For raised beds, loosen soil and turn it over by adding a combination of Miracle-Gro® Potting Mix and Garden Soil.
- For in-ground vegetables, amend your native soil with Miracle-Gro® Garden Soil.

STEP 6

Later in the season, be prepared to cover and protect your fall vegetable garden with frost protection fabric in the event of light frost.

STEP 3

Make troughs and plant seeds at depth and spacing as recommended on the packaging.

STEP 7

When the time comes, pick your vegetables and enjoy!

STEP 4

Water Deeply.

WHEN AND WHAT TO PLANT

What vegetables grow best in fall depends on the region of the US where you live. In the Midwest and Northeast, popular fall vegetables include carrots, lettuce and broccoli while in the Southwest, potatoes, carrots and tomatoes are widely planted. To know what grows best in your region, you may want to speak with a knowledgeable gardener at your local nursery.
